Volume 1, Issue 1

## MORE INTERESTING FACTS ABOUT THE

### ROMANS

- Romans invented central heating and strait roads
- Romans had lots of jewellery , they were often buried with their best possessions they are called burial goods

### HOW DID BABRAHAM SCHOOL SEE THE BODYS

Children from Babraham primary school visited Babraham Institute. They saw a slide show of some bodies .Then they saw some objects from under the ground such as horse skulls and coins . Jewelry

such as rings on fingers have been found and the children have seen a slide show . The children have seen coins and other artifacts .

## *Babraham's best play ever*

Year 4s from Babraham school have written and performed a FAB play of Jack and the Beanstalk on the 11th October 2006. They added a new character, Jim, Jack's twin brother. They added puns , alliteration and made it amusing.

### WHAT THEY DID

First they read the story and made sure they understood it. Then the children invented the new character which brought the play to life.

After that, the year 4s wrote the script

and gave out the parts.

### HOW THEY LEARNT TO ACT

Every day they practiced and Mrs Rogers, their teacher, helped them. They took their script home and practiced their parts. Catherine(8) said, "It was lovely to be part of it, but I got a bit nervous" Mrs. Rogers (44) said, "They are the best actors I have ever taught "

### WHAT THE AUDIENCE THOUGHT

The audience were filled with joy and

screaming with laughter . They were smiling with delight .Nobody in their right mind would miss another play like this.

## ROMANS ARE STILL IN ENGLAND

Roman remains were found Babraham Institute while digging up a new road .Archeologists have been discovering more bodies and objects.

A long time ago some people discovered a body but nothing else was found .Not so long ago, when the institute was building a new road,

they discovered another body, so they sent in the archeologists and they discovered many more and remains:three small children and over 50 adults.
